

# Lead Tester Needed

**LINE is an award-winning learning and communications company which has been producing interactive solutions for almost 20 years. Our continued success means we're expanding our QA team.**

We are looking to recruit an experienced lead tester to coordinate and manage Quality Control across the company. You will need to be a self-starter, educated to degree level with preferably ISEB certification.

## Key Responsibilities

- Developing and maintaining LINE's QA processes, and QA documentation.
- Designing and writing QA test plans to ensure LINE's e-learning courses have been tested for:
  - Functionality
  - Absence of errors/bugs and delivered to the design specification
  - Compliance to specified industry standards
  - Compliance to Accessibility requirements
  - Content testing ensuring all assets and material is included
  - Usability
- Coordination of testing resources and test plan execution
- Provide test reporting to development teams using existing bug tracking system
- Reporting to, and communicating with Project Managers to ensure testing is on time and on budget
- You will also be expected to perform a variety of testing to include functional, structural, regression, load and system testing

Experience is essential as are skills in the following areas:

- Hands-on skills with the basics of software testing, writing test cases, test strategies, and test plans,
- Clear understanding of functional specifications in the e-learning domain.
- Good concise writing skills for defining errors and being descriptive about faults discovered
- Knowledge of structured testing processes
- Good understanding of web-based and multimedia technologies
- Strong technical capability to build specific test suites for functional and/or compatibility testing
- Exceptional attention to detail, be able to proof read content
- Understanding of browsers /Plug-ins / Web technologies (HTML, Flash, Perl, CSS, ASP) and different Operating Systems/platforms
- Experience of working on own initiative and working effectively in a project team environment
- Knowledge or awareness of LMS standards and specifications
- Understanding of WC3 accessibility standards

All candidates should have a Foundation Degree or Degree and must be eligible to live and work in the UK or EU.
